PERSONAL STATEMENT

I am looking to transition my skills honed over five years of website development into a Junior Dev-Ops Engineer role. I can bring your company value by helping to manage your network infrastructure more efficiently and automating tasks that are repeated. I want a career environment with well defined goals, the opportunity to learn and utilize CI/CD deployment tools, while building the next generation of cloud native applications.

Red Hat Certified Engineer
Estimated Completion - Feb 2018

Red Hat Specialist - Ansible Automation
Estimated Completion - Apr 2018

EXPERIENCE

- Lead Website Developer**
Alpha Code Design | Apr 2012 - May 2017

Created search engine optimization plans for over a dozen businesses, local and national. Provided automated monitoring, analysis, and reporting to track success versus competition.

Developed and delivered high-end website solutions to a diverse client base by utilizing wide-ranging technologies and frameworks, such as integrating ecommerce gateway APIs.

PHP - HTML5 - CSS - Javascript - MySQL - Wordpress
- Cryptologic Technician - Collection**
United States Navy | Aug 01 - Aug 05

Collected Signals Intelligence (SIGINT) from within the Secure Electronic Surveillance Suite (SESS) in support of counter terrorism and anti-piracy efforts. Provided collection analysis tracking and reporting on signals of interest while operating efficiently in a high stress environment. I keep calm with pressure and rise to meet the challenges in a team driven culture.

Sun Workstation - UNIX - Blackbird - SAW - RDF - POD
