To the recruiters at ClickBank

Dear ClickBank,

Are you looking for a Jr Java Developer with:

- A year of hands on full stack web developer studies?
- A love for building Java-based web applications and APIs using Spring and RESTful web services?
- Experience in testing with JUnit and Mockito?
- Knowledge in React technologies?
- Knowledge in JS, HTML, and CSS?
- A passion to learn and work on your projects?

If so, then you need look no further. You will see from my enclosed resume that I meet all of these qualifications and more.

I would very much like to discuss opportunities with you. I have been a full-time student focusing on full-stack development for the past year. I have a love for building Java APIs with Spring and RESTful web services. I am also very confident using the React library and have strong Java Script skills. My most recent job was a Team Lead for Lambda School, where I solidified my soft and technical skills.

I hope you will consider me for your company. I am very excited to work with a top global internet retailer that powers one of the world's leading performance marketing platforms. I am excited for the opportunity to learn side by side with your developers to transition your legacy application to a modern software stack.

Thank you for taking the time to review my resume. I look forward to talking with you.

Sincerely,

Leslie Rodriguez
