KESHAWN SHARPER

Full Stack Web Developer

SUMMARY

I In high school, I discovered HTML through a web design class. I was very good at HTML but I never thought it was anything to make a career until after. When I graduated high school I fell in love with coding and logical thinking

SKILLS

- HTML
- CSS
- LESS
- SASS
- React
- Redux
- Axios
- NodeJs
- Sqlite3
- Javascript

PROJECTS

Refugee Stories / Front-End Developer (React)
September 2019 - September 2019
https://refugeestoriesbw.netlify.com/

Ilustrated the framework with ReactJS. Programmed the functionality to read an API so that users read and post refugee stories. The API restricts access without signing up and you cannot staple your created story without admin's permission. use this admin login to post your story.

username:someguy
password:1234adsf

Sauti African Marketplace Application / Front-End Developer (React)
November 2019 - November 2019
https://africanmarketplacemock.netlify.com/

• Utilized the JavaScript library of ReactJs while receiving data from a Java backend. Framed together with a client-side page that allows users to compare marketplace products, create their own product and remove their supply from the marketplace when signed up an in.

DevDesk Application / Back-End Developer (NodeJs)
December 2019 - December 2019
https://devdesk-2oeg3w4vj.now.sh/

Developed the back end using languages Javascript and sqlite3 with the libraries of knex, and jest. Successfully manufactured an API that users can create a ticket (a question in the app think of quora),view other tickets, edit their tickets and delete their tickets once they sign and log in.

Rick and Morty Single page application/ Front-End Developer (React)
September 2019 - September 2019
https://rickandmortyfanpage.netlify.com/

A rick and morty single page application. The user can browse all of the characters,locations and episodes in the proclaimed show. When the user click on an item in the tab it links you to the items personaized information to get a more in depth description. IThe site also has search funtionality on each tab other than home.

Dev Mad-Libs Marketing / UI Developer (React)
November 2019 - November 2019
https://awesome-rosalind-7d5640.netlify.com/index.html

I worked only on the marketing site. The marketing site gives the user information about the application and explains it's functions. Also the site is very responsive and adaptable to phone screens and tablets. It has a beautiful design and polished nicely.

EXPERIENCE
